

GOLD 'N' ROLL

Within our international vaulting network, the GVS Bullion Group offers storage possibilities for both institutional investors and private persons. Our vaults are developed for high security storage of precious metals in all forms (bars, coins, grain etc.). The widespread choice combines intra-European Vaults with international storage solutions. Our vaults are audited on a regular base, twice a year, by an external auditor and are fully insured against all insurable risks. Each location offers different advantages for investors to meet their individual needs.
